HICCER™

SPEED! STRENGTH! COMPETITION!
THE NEW VIDEO GAME HAS THEM ALL!

★THE REWARDS ARE GREAT

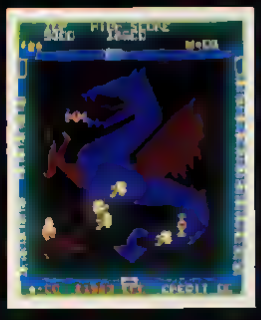
★THE PRICE FOR DEFEAT IS TOTAL

EMI

HOCCER™

★It is the year 2055. Man has nearly perfected nearly every aspect of his life, including sport. No longer does he compete against others; he now faces the ultimate challenger-- himself. Alone on the "Hoccer" field, he faces opponents he himself has created through his technological advancement.

★"Hoccer" is a combination of the agressive nature of hockey and the physical demands of soccer. The player must battle the Orbs, which were programmed solely to seek and destroy the player. He must also battle the Cleo, an advanced thinking machine which has perfected the ability to defeat his human opponent--almost.



Play Instructions

★Move "Andrew" around the rink to avoid the Orbs and the Cleo. Control his hoccer stick with the push button. Use the stick to push his opponents away when they are close. Also use the stick to fire the fiery orb called the "Hoc".

★Shoot the Hoc at the opponents (500, 1000, 2000 points etc.). Note smart Cleo can catch an oncoming Hoc and can fire at Andrew.

★Shoot the Hoc into the moving net (1000 points) to upset and freeze the opponents. You may push and destroy them at this time.

★Fire the Hoc through the "Spinnaro" and then at the blocks on the east and west sides to score additonal points (200, 400, 600, 800, 1000 points etc.).

★Destroy all 24 blocks on sides to gain an bonus man and proceed to the higher round.

★Destroy all opponents to proceed to the higher round.
